

RISHIKESH

STRUCTURAL SOLUTIONS LLP

Integrity | Quality | Satisfaction

YOUR VISION INTO REALITY

RISHIKESH STRUCTURAL SOLUTIONS LLP

- ▶ Rishikesh Structural Solutions LLP is a fastest growing Pre Engineered Building (PEB) manufacturer and Turnkey Project Service provider in India. It is wholly - owned subsidiary of M/s. N J Patel Associates which is in business of civil construction from last 20 years.
- ▶ We are a highly diversified Engineering concern covering Design, Engineering, Fabrication and Erection. Design and Detailing work is carried out by highly skilled engineering team having rich experience and expertise exclusively in metal buildings using fully optimized techniques keeping up the quality with no compromise and having excellent computer aided design and drafting facilities using the Indian and International design codes & specifications of PEB.

PRE-ENGINEERED BUILDING

- ▶ We have established ourselves as trustful entity developing highly durable PEB Structure Steel. We are engaged in providing the cost effective and energy efficient pre engineered structures to our clients. Owing to the next generation computer aided designing facility we are able to fabricate the innovatively designed structures for factories, warehouses, industrial sheds, dairy farms cold storage and many other applications.

INFRASTRUCTURE MACHINERY

Rishikesh has set up fully operational state of the art PEB manufacturing plant in Kurali (Karjan) in Gujarat having initial capacity of 30000 MT per annum. Factory is equipped with most sophisticated and modern machinery.

Automatic Continuous Welding Line

Intechangable C,Z & L Machine

COLD FORM MEMBERS

Purlins, girts and eave struts are secondary structural members used to support the wall and roof panels. Purlins are used on the roof; girts are used on the walls and eave struts are used at the intersection of the sidewall and the roof. These sections are extensively used in huge roofing solutions such as go downs, workshops, industrials sheds and many more. The plane surface of these sections on one side has made it a preferred material for cladding due to its easy installation on concrete structures or steel.

ROOF & WALL PANEL

- ▶ Rishikesh pre-painted Galvalume sheeting is a multi layer coated profile to ensure a longer life under different weather conditions and better aesthetics.
- ▶ Special base metals, metal coatings and organic finishes are selected to meet the most stringent international specifications.
- ▶ Metals and coatings are selected not only to perform in field but also to ensure proper roll forming and metal working in plant without impairing the finish. The metal skins are used as roof and wall panels, interior roof and wall liners, partition panels, soffit panels, etc.
